RE: Temporary Dust Control Project
Sunnyside Refuse and Slurry C/007/035

Incoming OK
C/007/0035

Dear Ms. Littig:

This letter is to inform the Division of a temporary dust control project being implemented at the Sunnyside Refuse site. This project will not create any additional disturbance to the refuse pile and we believe an amendment will not be required.

SCA is going to run a temporary water line with sprinklers across a portion of the coal refuse pile (approximately 500 feet) to help control fugitive dust and increase the moisture content of the coarse refuse material, which will help control fugitive emissions when processing the fuel. The pipeline will not be buried within the permit boundary and will not create any additional disturbance.

If you have any questions or if further clarification is needed please contact Rusty Netz or myself at (435) 888-4476.

Thank You,

Michael J. Blakey
